

PROTECT & SANITIZE YOUR OFFICE SPACE

WHAT AGORA CAN DO FOR YOU NOW.

EXTENSIVE COFFEE SYSTEM RESTORATION:

We know how long you've waited to use your coffee systems again, and we don't want you to wait any longer! With our Extensive Coffee System Restoration service we will provide the following:

- Deep cleaning inside and outside of your system with safe solution.
- Remove parts to get inside areas that have solidified due to sitting idle.
- Sanitize touchscreen
- *Your coffee rep will be dropping off Agora stylus pens for you to keep near your system for employees to use. We suggest keeping sanitizer wipes nearby as well to sanitize after usage.

BIOPROTECT SOLUTION SPRAY:

The latest to our sanitation services is our BIOPROTECT Solution Spray that sanitizes your systems **and** your countertops. Here are some of the benefits:

- The spray actively starts working after 60 seconds and keeps your systems and countertops protected for up to 3 months.
- The solution is water based, non-toxic to humans and animals, with no harmful chemicals - safe for food contact surfaces.
- The solution forms a covalent bond with substrate and creates a microbiostatic antimicrobial coating.
- Hospital grade disinfectant
- 30 second kill time for e.coli and s.aureus.

COMING SOON

TOUCHLESS OPTIONS FOR YOUR SYSTEMS!

BEVI SPARKLING WATER

You'll be able to use your Bevi machine directly from your phone!

- Scan QR Code on the Bevi touchscreen with your phone's camera or QR reader app
- Open link that appears on your phone's screen
- Dispense your drink as you would using the Bevi touchscreen
- Plus, you can see ingredients and how many bottles you're saving!

If your Bevi has internet connection, you will see a pop-up on your screen July 13th, to enable this feature. If not, contact us and we'll get you setup!

WELLSYS WATER SYSTEM

Dispense your water **HANDS-FREE!!** If you have a Wellsys Water System model 7000, 9000 or 11000 contact us about getting a foot pedal installed on your system simply, and quickly!

- This foot pedal is installed directly under your system
- All you'll have to do is slowly step on the pedal to release cold, fresh dispensing water!

This touchless approach will prevent these high traffic systems from spreading bacteria.

DE JONG DUKE SYSTEMS

Brew coffee straight from your phone!

- Your De Jong Duke coffee systems will have access to a touchless interface.
- The Connect.Me program is coming out soon and will allow you to scan a QR code to create your drinks!
- Or you can use the Agora stylus pens we will be distributing to offices during delivery.
